Mea Zen – THE LAST EYE OF iPHONE X

Ako som oslepil falošné oko — How I blinded the false eye

A TRUE STORY
A SMALL EXPERIMENT
A BIG QUESTION

1
VŠETKO ZAČALO NEVINNE ...
IT ALL STARTED INNOCENTLY ...

02:12
How To Be Invisible
Kate Bush
4:42
-0:51

iPhone X ešte žil.
The iPhone X was still alive.

2
ALE POTOM SOM SI VŠIMOL NIEČO ZVLÁŠTNE ...
BUT THEN I NOTICED SOMETHING STRANGE ...

Čo to je?
What is this?

Infračervené svetlo!
Infrared light!

Kamerou mójho Huawei 15T Pro som videl, čo ľudské oko nevidí.
With my Huawei 15T Pro I could see what the human eye cannot see.

3
FALEŠNÉ OKO
FALSE EYE

IR prisvetľovač
IR flood illuminator
IR kamera
IR camera
Projektor bodov
Dot projector

iPhone X má systém TrueDepth pre Face ID. Ten vysiela infračervené svetlo, ktoré kamera zachytí, ale my ho nevidíme.
iPhone X uses TrueDepth for Face ID. It emits infrared light that the camera can see, but we cannot.

4
BOL TOE VŽDY?
WAS IT ALWAYS ON?

Vidíš ma stále?
Do you always see me?

Aj keď ležíš?
Even when just lying there?

Zdalo sa, že to bliká opakovane, aj keď som sa ho nedotýkal ...
It seemed to blink repeatedly, even when I wasn't touching it ...

5
TAK SOM SA ROZHODOL ...
SO I MADE A DECISION ...

Oslepím to falošné oko ...
I'll blind this false eye ...

... a zistíme, či prestane.
... and let's see if it stops.

6
JEDEN ZÁSAH ...
ONE STRIKE ...

VRRRR!

Priamy zásah do „oka".
A direct hit to the "eye".

7
A POTOM ... TICHO.
AND THEN ... SILENCE.

Už nebliká ...
It's not blinking any more ...

Keď bolo oko mechanicky poškodené, infračervené svetlo prestalo.
When the eye was mechanically damaged, the infrared light stopped.

8
POUČENIE
THE LESSON

Možno nás zariadenia vidia viac, než si myslíme ...
Perhaps our devices see more than we think ...

... tak ako v piesni *How To Be Invisible* od Kate Bush.
... just like in the song *How To Be Invisible* by Kate Bush.

Staré sa rozložilo ...
ale príbeh pokračuje.
The old device is gone ...
but the story continues.

„Niekedy musíš oslepiť falošné oko, aby si lepšie videl to skutočné."
"Sometimes you have to blind the false eye to see the real one better."

A SMALL PHONE. A BIG QUESTION.
TEMPUS OMNIA REVELAT.
